

# Milling

We can fulfill your requests for individual drawing parts fast, precisely and cost-effectively.

Our production line in the range of milling allows us to process superior parts in highest precision. Our machinery marks high flexibility, special repetitious accuracy and short production times.

This means for you an economic production of components with closely tolerated specifications for measurements and surfaces. For doing that we use five 3-axis and two 5-axis centers for milling conditioning, where up to 60 tools can be applied.

We manufacture parts at large-scale and small-batch series up to 735 mm length x 410 mm width x 410 mm height. We guarantee short times of delivery and an especially economic production.
